Office Action Summary

Art Unit: 2837

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-28 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. No specific extension boards are set forth. How do the boards structurally and electrically cooperate with the remaining features to set forth the invention?

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being fully met by either of the Japanese documents cited in the information disclosure statement filed May 31, 2000.

Each document discloses tone color extension boards for an electronic musical instrument. It is not clear how the claims patentably define there over.

Art Unit: 2837

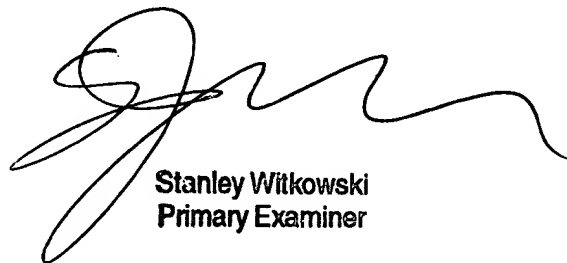

6. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being fully met by either of Shibukawa, Woron et alii, Franz et alii or Yuzawa et al.

The cards, ROM packs or RAM packs in the individual patents read on applicant's tone color extension cards for an electronic musical instrument.
